

THE PHILOSOPHY BEHIND CREATING A CONSCIOUS ENERGY EXCHANGE

The concept of a Conscious Energy Exchange is an evolutionary invitation for those that are moving through and beyond the need and desire for the acquisition of possessions and wealth and into relationship as a steward. When one has awareness that there is more to life than the pursuit of wealth and riches, a search begins to discover a more meaningful and fulfilling way of living and being.

In the old paradigm way of doing things most people have operated with a belief that financial resources are limited, are theirs, and come from them. This perpetuates the fear of not having enough and controls how they spend or invest their money and resources. This fear easily leads to the experience of never having enough, even if in reality what one needs is readily available. Because the amount they currently have is a finite amount measured by a bank balance or the money in their pocket, a closed-circuit loop is created and experienced.

However, those who realize that nothing comes FROM them and that EVERYTHING, including health and wealth, comes FROM GOD and flows THROUGH them, have created a different relationship with life, money and all forms of abundance.

By trusting in each now-moment connection with GOD, listening, and feeling the guidance and abundance being received in each now-moment, not only do we know that there is always enough, we also know the appropriate amount to give as an exchange for what we have received.

Are you open to create a 'Conscious Energy Exchange' and give to Angel Valley what SOURCE or your Higher Self is guiding to give in exchange for what you have or will be receiving? A bridge needs to be built between a reality where your mind tells you what to pay and a reality where you are guided from within and you give what is felt as being in alignment with that guidance.

For those people who need assistance in building this bridge please ask for our old paradigm pricing as a foundation on which to reflect. Then feel into what we would have charged you in the old paradigm for what you are requesting and then give what you are being guided from within to give. It is very simple and it only requires that you feel into, listen, and act on your own inner guidance.

We feel that communication is one important aspect and we are requesting your support in building this bridge and communicating your feelings and comments with us.
